

# EYE WITNESS ☆

*Children become eye witnesses to review the events that take place in the Bible story.*

## TOPICS:

Review Activity

## MATERIALS:

Two or three note pads, clipboards  
Pencils

## DURATION:

Approximately 20 minutes

## PREPARATION

Before class, choose a story from the Bible to share with the class. Then, prepare several questions that pertain to the Bible story. These questions will be asked of the eyewitnesses of the Bible story. Write the questions down on the note pads or clipboard paper with plenty of room after each one for the interviewer to write down responses from the witnesses.

## WHAT YOU WILL DO:

First, read the Bible story to the class several times. Make sure the kids have a good understanding of the story and the events that took place. Then form two or three groups. Designate one person in each group as an interviewer. The other kids are to be the eyewitnesses to the event. Give each interviewer a note pad or clipboard with the sample questions. Older kids may wish to come up with their own questions. Have the interviewers ask each eyewitness one or more of the questions, and record the responses. It is okay if different children come up with different answers, suggest they write down every account.

When finished recording the eye witness accounts, the interviewers will report their findings as if they are a news correspondent or journalist. As the news reporters share their findings with the rest of the class, inform the remaining students that they are like an audience for a news broadcast. Have each news reporter repeat each question before giving the responses of the eye witnesses.
